DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-42 are rejected under 35 U.S.C. 102(b) as being anticipated by LaCombe (US 5872890).

Lacombe discloses the claimed invention including, *inter alia*, a flow through tube made of solid material surrounding the heating rod within the flow path, a plurality of temperature sensors located to determine the temperature and flow of fluid both at the inlet and outlet of the flow path, the sensors located on the *top portion of the path with respect to gravity*, a circulation pump and temperature control system responsive to the plurality of temperature sensors. It is noted that it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138.

Response to Arguments

Applicant's arguments filed 2/22/06 have been fully considered but they are not persuasive. Applicant argues that claim 42 was not addressed in the office action. It is noted that claim 42 was addressed in the rejection, [see the italics in the above rejection] but inadvertently omitted from the Office Action Summary. This omission amounts to a typographical error. Further applicant argues that the prior art does not teach a heater arranged in the flow-through

Art Unit: 3742

path, at least one heating element arranged in the heater; and a temperature sensor positioned in the heater and in thermal contact with the at least one heating element. The examiner respectfully disagrees. The broadest reasonable interpretation of the claims reads on LaCombe.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thor S. Campbell whose telephone number is 571-272-4776. The examiner can normally be reached on Mon-Fri 5:30AM-2:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 571-272-4777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
